**Re: NPDES Permit No. TN0078701
Notice of Incomplete Application
Haskins Hogs
Lewisburg, Bedford County, Tennessee**

Dear Mr. Haskins:

The Division of Water Pollution Control (the division) has received your application for the above referenced project in our office as of September 26, 2008 and of a revised Comprehensive Nutrient Management Plan (CNMP) on August 10, 2009. We have reviewed the application for completeness in accordance with TDEC rule 1200-4-5-.05 (2) and find the application to be incomplete. The processing of this application has been suspended until the following information has been submitted:

- Application Form 1 – The description provided in the Nature of Business section states, in part, "Currently all sows, gilts, and nursery pig are on the ground. Due to the fact that this is a discharge situation and land base will not support additional manure this operation will become a grow-finish facility." The division does not understand this statement, which is also given in the CNMP on page 6 under subpart 1.1. Please provide written clarification, clearly explaining the intention of this statement.
- Application Form 2 – Subpart II.A lists the number of animals at your facility. The form lists 185,000 chickens, in addition to 3,000 swine. Please verify this and correct if necessary. In addition, subpart II.E. requests the date of the last review or revision of the nutrient management plan. Please provide the appropriate date.
- CNMP, Closure Plan – The closure plan that was submitted as part of your CNMP states that it applies to Baisley Dairy. Please submit a closure plan that is written to address maintenance of your facility until proper closure is completed and includes a proposed schedule for closure not to exceed 360 days.
- CNMP, Mortality Management – Your CNMP does not provide a description of the procedure that will be followed to bury normal mortalities, catastrophic mortality burial methods are provided. Please provide the procedure that will be followed to handle the burial of normal mortalities.

Please submit the above requested information to our office, at the address listed at the top of this letter, by October 2, 2009. You should be aware that in accordance with TDEC Rule 1200-4-5-.05 (2), your receipt of this notice does not preclude the division from later requesting additional material that subsequent to the notice of completeness is determined to be necessary for permit processing.

If you have questions, please contact the division at your local Environmental Field Office at 1-888-891-TDEC; or, at this office, please contact Ms. Erin O'Brien at (615) 253-2245 or by E-mail at Erin.O'Brien@tn.gov.

Sincerely,

Vojin Janjić
Manager, Permit Section
Division of Water Pollution Control
